Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3 and 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following lack sufficient antecedent basis:

Claim 2, "the opposite surface";

Claim 3 and 6, "both sides";

Claim 5, "the electrically conductive layer," and, "said electrically conductive layer."

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Higgins (5291062).

Claims 3, 4, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Higgins (5291062).

Higgins is applied for the same reasons it was applied to the rejection of claims 3, 4, 6 and 7.

Although Higgins does not appear to explicitly teach that the first insulating substrate is lined on both sides with copper, and the second substrate is lined on one side with copper, at column 4, line 65 to column 5, line 44, Higgins teaches that the first insulating substrate is lined with conductive traces and the second substrate is lined on one side with conductive traces.

Moreover, official notice is taken that it is well known to provide copper conductive traces. Furthermore, it would have been obvious to combine the well known product and process with the invention of Higgins because it would provide conductive traces.

The prior art made of record and not applied to the rejection is considered pertinent to applicant's disclosure. It is cited primarily to show inventions similar to the instant invention.
